

Checkpoint call - Friday June 23rd: 13:30 - 14:00 (GMT+1)

Attendees

- Astrid van Toor
- Leigh Feaviour

Notes

- Astrid shared the progress with the code, now getting data from two APIs. Unfortunately IEEE still hasn't responded to her request for an access key and we really want to use three APIs. Leigh will put in a request to IEEE too, and will also look at alternative APIs as a backup.
- We discussed some of the UI features such as:
 - Checkboxes instead of drop-down menu to select APIs to use, including a select/deselect all option.
 - Append results to an existing file rather than create a new file for every search, with the option to start a new file.
 - Have a button to open the Excel file rather than opening automatically after every search. This will allow multiple searches before seeing all of the results together.

Actions

| | |
|--------|---|
| Astrid | Continue with the coding |
| Leigh | Request IEEE access key and look for alternative APIs |
