

Checkpoint call - Friday July 7th: 13:30 - 14:00 (GMT+1)

Attendees

- Astrid van Toor
- Leigh Feaviour

Notes

- The code is finished, all the error handling is put in place, and all the BDD scenarios have passed.
- The code has been tested thoroughly throughout development. Besides BDD scenarios for manual testing, the back-end was continuously tested by calling the methods and verifying the responses, while validating the error handling by raising mock errors.
- It's time to think about the outline of the presentation. We have started a shared .pptx plus a document to capture our ideas.
- We will speak over the weekend to finalise the presentation.

Actions

Astrid	Ensure code is critically commented throughout
Leigh	Start first draft on slides
