Checkpoint call - Thursday July 13th: 10:00 - 10:30 (GMT+1)

Attendees

- Astrid van Toor
- Leigh Feaviour

Notes

- All code has been completed and tested with additional comments added for clarity, and to describe in more detail some of the key design/development decisions.
- The presentation storyboard has been completed and looks good.
- We agreed how to share the slides between us. It should give a relatively equal time between us. We feel that, with only two of us in the team, switching between us a couple of times should add to the cohesive feeling of the team rather than being a distraction. We were careful not to switch after every slide, however, which would have been distracting.
- We agreed to record our respective slides over the weekend to compile into a final version on Sunday evening.

Actions

Both	Record respective slides, trying to stick to a total of around 10 minutes each
Leigh	Export into a final video presentation and compress to appropriate size for submission, alongside other artefacts to submit.
