Checkpoint call - Friday June 30th: 13:30 - 14:00 (GMT+1)

Attendees

- Astrid van Toor
- Leigh Feaviour

Notes

- Astrid's code and Leigh's test script were reviewed.
- The code has two APIs coded so far. Astrid and Leigh have both received API keys for IEEE so that can now be added as the third API.
- Astrid demonstrated the code so far to help with the test scripts and to take feedback.
- A few changes to the UI were suggested to make it a little more user friendly. However, we agreed that the main focus of the project is on the intelligent agents, showing how they interact etc., so the UI is secondary.
- We also reviewed the requirements for the final presentation because the submission date is starting to get close. This raised some questions that Leigh will clarify with Oli.

Actions

Astrid	Add IEEE API to the code
Leigh	Complete the BDD test scripts
Leigh	Email Oli with questions about the final presentation
